

# Creating a Cleaner Future for and Benefitting Peoria County for Decades to Come

Repsol Renewables North America is developing a large-scale wind project in northwestern Peoria County. The Four Creeks Wind Project is expected to generate at least 400 megawatts (MW) of wind power, which has the potential to power over 130,000 homes annually.

## Bringing a Long-Term Economic Boost to Peoria County

Wind power pumps billions of dollars into the country's economy every year, particularly into rural areas, where a large percentage of utility-scale wind projects are located. The Four Creeks Wind Project represents a major capital investment, which will result in a significant increase in Peoria County's taxable property base.

Providing additional tax revenues, which could total tens of millions of dollars over the life of the project, for road upgrades, schools, public safety, and other critically important infrastructure services

Paying tens of millions of dollars to local landowners over the life of the project through escalating annual lease and easement agreement payments, resulting in a consistent stream of revenue that can protect against fluctuating commodity prices and help maintain family farms

Creating hundreds of family-wage construction jobs and more than 10 full-time operations jobs as well as increasing business activity among local hotels and motels, grocery stores, gas stations, restaurants, equipment rentals, materials suppliers, and similar businesses

Putting decommissioning security in place prior to construction to ensure the host community and landowners will bear no responsibility for decommissioning and restoration

## About Repsol

In March 2024, ConnectGen was acquired by Repsol and now is integrated into Repsol Renewables North America. Repsol is a global multi-energy company committed to reaching net zero emissions by 2050. Present throughout the energy value chain, it employs 25,000 people, distributes its products in more than 90 countries, and serves 24 million customers. Repsol is a major player in the Spanish energy retail market, with more than two million customers, boasts a global renewable energy portfolio of more than 3,000 MW in operation and has 60 GW of wind and photovoltaic facilities in Spain, the United States, Chile, Italy and Portugal.
